

83. Display Delete and Update Buttons only to Post Creator

#reactjs #chakraui #frontend #styling #hydration #error

- We should show **delete** and **update** buttons only to the creator of the post
- We use **useMeQuery()** to check that

/pages/index.tsx

```
const [{ data: meData }] = useMeQuery({
  pause: isServer(), // when I run the query on the server I get a hydration
  error on browser
});

/* .... */

<Flex mt={4} flex={1} align="center">
  <Text>{p.textSnippet}</Text>
  {meData?.me?.id !== p.creator.id ? null : (
    <Flex ml="auto">
      <NextLink
        href="/post/edit/[id]"
        as={` /post/edit/${p.id}`}
      >
        <IconButton
          mr={1}
          icon={<EditIcon />}
          aria-label="Edit Post"
        />
      </NextLink>
      <IconButton
        onClick={() => deletePost({ id: p.id })}
        icon={<DeleteIcon />}
        aria-label="Delete Post"
      />
    </Flex>
  )}
</Flex>
```
