30. GraphQL Query - posts

#graphql #graphql-codegen #query #frontend

Add posts query

/graphql/queries/posts.graphql

```graphql
query Posts {
 posts {
    id
    createdAt
    updatedAt
    title
  }
}
```

- Run codegen to generate the TypeScript code for graphql

```
yarn gen
```

- and now we have userPostsQuery() hook in /generated/graphql.tsx
